Job Description

Apply Before:20/05/2025

Position: PHP Developer/Laravel
Location: Dange Chowk, Thergaon, Pune,
Employment Type: Full Time
CTC: As per company norms.

Job Description (in Brief):

We are hiring PHP Developers with **0 to 6 months of experience** who are proficient in **PHP, WordPress, Laravel, and CodeIgniter** to develop websites and web applications. The ideal candidate will participate in the complete software development lifecycle—from requirements analysis to testing—and must be comfortable working in a team or independently.

Technical Key Skills:

• Strong expertise in MVC, PHP Frameworks (Laravel, CodeIgniter)
• Proficiency in jQuery, AJAX, Bootstrap
• Knowledge in HTML5, CSS3, JavaScript, SQL Server, WordPress, MySQL
• Hands-on experience with Core PHP, APIs, AJAX
• Familiarity with tools like Jira, Trello, Basecamp, Click, Bug Herd
• Proficient with Git and RESTful APIs
• Knowledge of Linux, LAMP/WAMP, and server management
• Experience with database optimization and query performance
• Preferred: Exposure to open-source platforms like WordPress and Shopify

Desired Competencies:

• Strong understanding of OOPS concepts
• Ability to design and maintain scalable applications
• Experience in database design, normalization, and RDBMS
• Good communication (written & spoken) and logical reasoning skills
• Ability to work independently and as part of a team

Roles & Responsibilities:

• Develop and maintain web-based applications using open-source tools
• Manage Laravel app servers for performance and uptime
• Integrate third-party APIs and services
• Participate in QA processes including code reviews and testing
• Debug server and performance issues
• Handle project lifecycles independently—from design to delivery
• Maintain technical documentation and support tools
• Design scalable applications and database structures
• Ensure on-time project delivery and updates
• Suggest improvements for development tools and practices
• Collaborate with team members to solve complex problems
