## Job Description

---

### Apply Before:20/05/2025

**Position:** MERN Stack Developer

**Location:** Stop, Dange Chowk, Thergaon, Pune,

**Employment Type:** Full Time

**CTC:** As per company norms.

#### Position Overview:

As a MERN Stack Developer, you will be responsible for developing and maintaining web applications using MongoDB, Express.js, React.js, and Node.js. You will work closely with cross-functional teams to design and implement scalable, high-performance solutions. Your expertise will contribute to building user-friendly applications that provide seamless experiences across platforms.

#### Qualifications:

- Bachelor's degree in computer science, Information Technology, or a related field.
- 6 months of experience in full-stack development using the MERN stack (MongoDB, Express.js, React.js, Node.js).

#### Desired Competencies:

- Strong proficiency in JavaScript, including DOM manipulation and JavaScript object models.
- Expertise in front-end technologies such as HTML5, CSS3, and JavaScript frameworks/libraries, especially React.js.
- Strong understanding of JavaScript (ES6+), HTML5, and CSS3.
- Proficiency in working with Redux or similar state management libraries.
- Experience with back-end technologies, including Node.js and Express.js.
- Proficiency in working with databases, specifically MongoDB, including design, implementation, and maintenance.
- Familiarity with RESTful APIs and integration of front-end and back-end services.
- Knowledge of version control systems, particularly Git.
- Experience with cloud services such as AWS, Azure, or Google Cloud is a plus.
- Familiarity with Agile/Scrum methodologies.
- Understanding of front-end build tools like Webpack, Babel, and NPM/Yarn.
- Strong problem-solving skills and ability to troubleshoot complex issues.
- Excellent communication skills and the ability to collaborate effectively with team members.

#### Roles & Responsibilities:

- Design, develop, and maintain full-stack web applications using the MERN stack.
- Build scalable and responsive front-end interfaces using React.js.
- Develop robust back-end applications with Node.js and Express.js.
- Manage and maintain database structures with MongoDB.
- Implement RESTful APIs to connect front-end and back-end components.
- Implement and maintain state management solutions using tools like Redux or Context API.
- Collaborate with UI/UX designers to translate designs into functional applications.
- Optimize applications for maximum speed and scalability.
- Work closely with project managers and other team members to meet project timelines and deliverables.
- Write clean, maintainable, and efficient code with a focus on quality and performance.
- Conduct code reviews and provide constructive feedback to peers.
- Troubleshoot, debug and upgrade existing software.
- Participate in all phases of the development lifecycle, including planning, development, testing, deployment, and maintenance.
- Stay current with emerging technologies and industry trends to continuously improve skills and project outcomes.

#### Nice to Have:

- Experience with server-side rendering (SSR) and Next.js.
- Knowledge of TypeScript for adding static type checking to JavaScript.
- Experience with CI/CD pipelines and DevOps practices.
